## **AL-1500XQCE Ameritron 1.5kW HF Linear Amplifier with QSK-5 insta**

**£4,849.94**

## **DESCRIPTION**

The AL-1500XCE linear amplifier delivers 1500W CW output with only 65W drive. The AL-1500 also features time delay starting to protect the 3CX1500/8877 valve and its components and over-current protection to remove the drive if mistuned. A commercial grade blower provides quiet operation at full rated airflow to maximise valve life. \* 1.8 - 30MHz (inc WARC \* Full 1.5kW output \* Built-in 230V AC supply \* Uses 3CX1500/8877 valve \* Dual meters \* Tuned inputs \* Warm up time 180 seconds \* QSK-5 installed \* By-pass switch \* Shielded RF compartment \* Matches Solid State Rigs \* Input: 50 Ohms 65W (typ) 100W (max) \* Connectors: SO-239 \* Meters: Current, Voltage, Drive \* ALC, Power output (PEP) Watts \* Matching: Pi-network input, Pi-L output \* Voltage: 3,300V \* PTT: Keys amp when grounded \* Size: 470 x 432 x 254mm \* Weight: 35kg
