

Anytone AT-D578UV Plus - Dual Band DMR Digital Mobile Transceiver

£349.99

DESCRIPTION

The new Anytone D578UVPRO is part of the manufacturer's range of models. The D578UVPRO is the only available model, as all modules come factory-fitted. This model boasts impressive specifications with a frequency range of TX 144-146MHz and 430-440MHz, as well as RX 136-174MHz and 400-470MHz. Equipped with a VHF power output of 50W/25W/10W and UHF power output of 50W/25W/10W, the Anytone D578UVPRO supports full duplex working mode on UU, UV, VV, and VU. It features dual RX for Analog+DMR or Analog+Analog, making it a versatile option for users. Additionally, the device is DMR Tier 1 and 2 compliant, offering actual 2-slot functionality. The Anytone D578UVPRO has vital features, including digital or analogue reception auto-sensing, 4000 channels + VFO, 10,000 talk groups with 500,000 digital contacts, and a 1.77-inch TFT colour LCD. Other notable functions include weather alerts, VOX function, digital recording and play, AES256 digital encryption, crossband repeater function, GPS ranging between radios, and IP connection to Motorola repeater.
