

## **Diamond r-1 : 3.6mhz optional radial element for cp6 antenna**

**£54.95**

### **DESCRIPTION**

The Diamond R-1 is an optional radial element designed for the CP6 antenna. It operates at a frequency of 3.6MHz. This radial element is specifically designed to enhance the performance of the CP6 antenna by improving its ground plane. By adding the Diamond R-1 to the CP6 antenna, users can expect improved signal reception and transmission capabilities, especially in the 3.6MHz frequency range. The Diamond R-1 is a valuable accessory for those looking to optimize the performance of their CP6 antenna in this specific frequency band. Freq:3.575 to 3.650MHz, Length:1.8m / Weight:700g.
