CAROLINA Short 40™

Formerly CAROLINA WINDOM® Beam 40

SH-40 RadioWorks Carolina Short 40-10m antenna (Carolina Beam 40)

£159.95

Specifications

Frequency Coverage:	40 - 10m
Gain:	As much as 10 dBd*
Feedline:	50-ohm coax
Power Rating	1500 watts CW/SSB

*Based on user reports, field evaluations, and product reviews. Gain is due primarily to the low angle radiation pattern which does not exist in common antennas.

DESCRIPTION

The SHORT-40 Radio Works Carolina Short 40-10m, The Carolina Beam 40 has three vertical radiators properly spaced out to produce low-angle, beam like performance. The horizontal portion of the antenna interconnects the three vertical sections and acts as both a feed system and a radiating counterpoise. The result is a multi-element inverted-vertical antenna that operates high in the air, free of ground losses. It is a very efficient antenna. The overall length of the Carolina Beam 40 is only 15.25m (50ft.) easily placed in most small gardens.
