Tuner required?

A manual tuner is recommended, but CAROLINA WINDOM® Compacts™ will work with wide range automatic tuners. With normal installations, most transceivers with internal automatic tuners will tune these antennas.

**Space saving design fits easily in your back yard.
Finally, a BIG SIGNAL from your QTH.**

CAROLINA WINDOM® 40 Compact™ Features

- 6 meter band covered
- New Matching Transformer
- New Line Isolator
- Full coverage of 40-6 m, including the WARC*
- #14, stranded, hard-drawn copper antenna wire
- Kevlar line is used for long life support of the folded element.
- CAROLINA WINDOM® Compact™ versions of most models of the CAROLINA WINDOM® will be available soon.
- Visit our website often for the latest releases.

*Some specification are subject to change as development continues.
