## **Buddistick Deluxe Vertical Antenna Package**

**£194.95**

### **DESCRIPTION**

Designed as a multi-band, portable antenna for 40m - 10m, the Buddistick is an excellent performer with any rig up to 250 watts. It works exceptionally well with the Yaesu FT 817, Elecraft KX3, K2 and KX1, IC 703 and other QRP rigs.

The Buddistick Deluxe Package comes packaged in a compartmentalized 1000 denier cordura portfolio bag and includes 2 aluminum arms (black), two standard telescopic whips, one adjustable coil, 3 coil clips, mounting kit, a complete counterpoise system, your choice of our vertical antenna clamp or mini-tripod, as well as [operating manual](#).

Included is one 31' radial on a line winder for use on all bands 10 - 40m.

The mounting kit for the Buddistick is a mounting plate and SO-239 adapter for a straight coax feed. A rubberized clamping knob is used to secure the plate to a clamp or tripod (1/4" x 20 threads).

The Buddistick Deluxe Package contains the following:

- 1). Buddistick Antenna
- 2). Vertical Antenna Clamp OR Mini-Tripod
- 3). 2 Standard Telescopic Whips
- 4). 3 coil clips

**Power Rating: 250 watts PEP**
