AL-82XQCE Ameritron 1.5kW HF Linear Amplifier with QSK-5 install **£3699.95**

DESCRIPTION

The AL-82XQCE linear is designed to give you years of trouble free service. Two bias settings allow either high efficiency RTTY and CW operation at 1,500W of output at nearly 70% plate efficiency or low distortion 1,500W SSB, SSTV or AM output. The cooling system keeps the valve and components safely below the manufacturer's ratings. The filament supply has inrush current limiting to ensure maximum valve life.

* 1.8 - 30MHz (inc WARC) * Output: 1.5kW PEP (850W CW) * Input: 50 Ohms 100W (typ) 130W (max) * 1,500W output * Built-in 230V AC supply * Inrush Current Protector * Dynamic ALC * Warm-up time 5 seconds * Two Eimac 3-500Z * Illuminated Meters * Tuned Inputs * Voltage: 3,300V * PTT: Keys amp when grounded * Size: 470 x 432 x 254mm * Weight: 34.5kg
