Buddipole W3-CAP Buddipole Folding Capacity Hat £69.95

DESCRIPTION

The folding capacity hat is a lightweight and simple way to add efficiency and bandwidth to your Buddistick, VersaTee Vertical, or Buddipole antenna system. Each of 5 spring-loaded elements folds and locks securely into place. A perimeter wire is attached and the resulting effect is like adding nearly a full 6 feet of additional electrical length to the very end of the antenna (right where you want it). Get ready to make physically shorter antennas that perform like much larger ones!
