Begali Pearl Dual Paddle Morse Key

£269.95

DESCRIPTION

Begali Pearl Dual Paddle Morse Key

The Pearl key combines gracefully rounded shapes and an exquisite finish with a high-performance mechanism. Precision adjustments and perfect weight distribution in the moving parts make sure that the beauty is not only skin deep - this key will not let you down at even the highest speeds. The base is available with three different plating materials: gold, palladium (shown here), or a bright silver nickel. If you select gold or palladium as the finish for the base, then the bearing block will be gold plated. If you select nickel as the finish for the base, then the bearing block will also be plated with nickel. The adjustment screws and the contact posts are always gold plated. For a visual impression of the gold/gold combination, take a look at the Contour key, and the nickel/nickel combination is featured in the photo of the Graciella Jr. The contacts are 925/1000 silver. The finger pieces are a red anodized aluminium.
