Begali Contour Dual Paddle Key

£259.99

DESCRIPTION

The Contour Gold key combines gracefully rounded shapes, similar to the Pearl key, with a more traditional rectangular base, which makes it a little heavier and larger than the Pearl. The same high-performance mechanism and the same exquisite finish make this a key that produces a statement on the air and on the table. If the Pearl is a beauty queen, this is her perfectly matched companion. The base is available with three different plating materials: gold (shown here), palladium, or a bright silver nickel. If you select gold or palladium as the finish for the base, then the bearing block will be gold plated. If you select nickel as the finish for the base, then the bearing block will also be plated with nickel. The adjustment screws and the contact posts are always gold plated. For a visual impression of the palladium/gold combination, take a look at the Pearl key, and the nickel/nickel combination is featured in the photo of the Graciella Jr. The contacts are 925/1000 silver. The finger pieces are a red anodized aluminum, like those shown on the Pearl key - the silver finger pieces in this photo were only made for the prototype.

Like with the Pearl, the distinctive beauty of this key is matched by superlative performance. This key will satisfy you even if you are a world-class high speed operator. You can also order this key with a Jet Black base that is coated with Titanium Nitrate for a "Professional" look. For a visual impression of this type of finish, take a look at the Simplex Pro
