# Uniden®

## Programming Software for the UBC-3500 - Pro Version **£59.95**

### DESCRIPTION

Programming Software for the UBC-3500 - Pro Version

ARC3500 includes the most versatile memory editor available on the market, our new developed 'intelligent system browser' technology makes navigation as easy as possible and you can customize the browser.

QuickKey Overview: 'Drag and Drop' your systems or groups in QuickKeys.

Copy/paste groups between systems, building new systems was never this easy!

Import data from CSV/UASD files

the Uniden USB1 PC cable is now also available in Europe.

'intelli upload': Replaces systems that are stored in your scanner without having to reset your scanner first!

Full Virtual Control ( ARC3500 BASIC and ARC3500 PRO).

WebLink: Store a website in a system file and checking for the latest updates requires only one mouse click.

Don't have a serial port? ARC3500 also works with the Uniden USB-1 cable.

Windows XP/2000/Vista/7 , minimum 800x600 video, 512 RAM (Windows 95/98/ME are NOT supported)
