## Buddipole Rigid Shock-cord Adjustable Whip

**£109.96**

### DESCRIPTION

The Rigid Series Shock-cord Adjustable Whip Antennas build on the success of our standard shock-cord whips that have been in field use for over 8 years. The new Rigid Series utilizes larger tubing diameters and adjustable base and top elements to provide more versatility for use with any vertical or dipole configuration. We are now able to produce shock-cord whips up to 210" in length (RSAW 5/32) while maintaining enough rigidity to withstand significant wind loads (may require guying).
