Kent KT-1 Conversion Stand Kit

£42.95

DESCRIPTION

The kit comes complete with all screws, cable and hardware to convert the standard wood base Kent key to the KT-1 model. The steel base kit needs most of components from the original Kent key to complete the conversion and the kit is compatible with all Kent Low-Line hand keys made after 1985.

The assembly is straightforward and only requires the use of screwdrivers, wire cutters and a small soldering iron.

For more information on the conversion the assembly notes are available in a PDF file
