## LawMate PV-AC20 HDWI AC Adaptor £249.95

### DESCRIPTION

This is the new LawMate PV-AC20 HDWI Camera System, a WI-FI enabled, high definition covert recording device cleverly disguised as an everyday mains adaptor. Unlike many covert recording devices, the LawMate AC20-HDWI camera system is mains powered negating the need to ever worry about recharging batteries. Plug the camera in to a standard UK 3-pin mains socket and leave it to covertly record 1080p HD time stamped, Law Enforcement grade video and audio. The recorder element is built in to the mains adaptor; this is also the location of the high quality AGC microphone. The camera is discretely hidden in the front of the adaptor allowing easy installation and application in every day office or home environments. The new PV-AC20HDWI also features Wi-Fi connectivity to either an Android or Ios smart device application allowing full user control and live preview from the camera. As the camera also has IP capability, you can live stream the video from anywhere! Supplied with the camera is a free 8gb card which will capture up to 4 hours of continuous video or much longer when using motion detection. For longer recording sessions, you can use up to a 32gb Micro SD card. To playback the recorded video you can connect the camera to your computer with the supplied USB cable or place the SD card in to a standard card reader to playback via your computer. Alternatively, use the Wi-Fi connectivity to view or even download the video remotely.

Features:-

DVR built in to the power adaptor

1080p/720p/VGA video options

Watermarked time-stamped evidential grade video/audio

Motion detection or continuous recording options
