MetroVNA Analyser Deluxe 250MHz £289.96

DESCRIPTION

Technical Feature MetroVna Deluxe 250MHz

- 100KHz/250 MHz Coverage 630/1.2 mt in continuous
- Measures R, Z, | X |, SWR, TL, | Phase |, ReturnLoss,
- Dynamic RF-Meter 70dB
- Maximum input Signal + 5dBm
- Precision +-1dB
- Operating Voltage 3.3 V
- Size 128.5 mm x 94 mm x 26 mm
- Weight 8, 1 oz.

Functional characteristics

- Display 16 k color touch screen

- 20 internal menu

PRO Touch MetroVna version 1/250 MHz bandpass

- 3.3 Volt power supply

- Internal rechargeable battery

-USB battery charging circuit

-USB/Bluetooth

-Possibility to update the FW via USB

-100% compatibility with IG/VNA, VNA/J, BluVNA and other

-compatible with Android Tablet, Smartphone

-SW Platform WIN, LINUX, ANDROID, MAC

MetroVna is a modern Antenna Analyzer that works from 100KHz/250 MHz and covers all bands from 630 to 2mt + band 220MHz. The tool allows the user to perform measurements on antennas such as dipoles, vertical directives, or home made antennas. Unlike other analyzers, this also allows you to operate in broadcast mode for measuring filters, attenuators or other types of more complex measures.

Thanks to the large backlit Colour Touch Screen you can view all the measures, with traces of different colors and refresh of 0.5 ms. Thanks to the powerful 32 bit micro the tool is a breeze.
