## Airnav ACARS Decoder

### £139.96

## DESCRIPTION

AirNav ACARS Decoder is by far the world's most successful ACARS Decoder currently available.

With years of experience, AirNav Systems has developed the AirNav ACARS Decoder, a product with extreme performance (low messages loss), with all the features an aviation enthusiast needs.

Stop using expensive and complex ACARS decoders that require hardware and is difficult to set up.

You just need a source of ACARS messages (an airband receiver or an internet connection). That's it. You will start receiving real aviation data & messages, sent from flights, in real-time.

Real-time ACARS Decoding

Real time flight information (registration, type, company)

New Live Text Log with aircraft pictures

Renewed interface

Connects to Internet ACARS Servers to receive messages without an airband receiver

Automatic Accurate Aircraft Data Download

"Flight Watch" feature

Statistics in real-time

Editable Aircraft Database

Compatible with AirNav Suite and AirNav RadarBox
