## **MESSI & PAOLONI RG-58** **Coax** **£1.07**

### **DESCRIPTION**

[5 mm / 0,197 inches Cable]

Flexible 50 Ohm coaxial cable, suitable for short stretches and low frequencies. The MIL C17-F series is thoroughly manufactured according to american military standards, and the great care with which Messi & Paoloni realise these models has gained us the classification as Class A manufacturer by the Italian Ministry of Defence.

Although it represents a tradition in the coaxial cable's world, the RG58 is now surpassed for characteristics, attenuations, flexibility and lightness by our 5 and 5,4 millimeters models AIRBORNE 5/.200" and HYPERFLEX 5/.212"
