SPIRIT OF AIR 10M TELESCOPIC POLE

£39.95

DESCRIPTION

The Spririt of Air Telescopic Fiberglass Mast is 10 metres tall when fully extended, yet collapses to a mere 115cm. Weighing only 1.5 kilos ! When extended it is the length of a full quarter wave on 40 meters! The bottom section is 45mm in diameter. Its great for portable and temporary use -- Put up a full size inverted Vee dipole or full size vertical antenna in minutes and get full size performance! The Telescoping Fiberglass Mast is made of strong fiberglass Its black coating is resistive to UV. Please note these are whippy and are for temporary events rather than every day use

Key Features/Specifications:

Collapsed length 115cm

Diameter at base 4.5cm

Weight 1.5 Kilos
