

## **Zetagi HP500 SWR/PWR meter with twin window frequency range of 3-200 MHz**

**£79.96**

### **DESCRIPTION**

The ZETAGI HP500 professional meter is designed for measuring v.s.w.r. and power across a wide frequency range of 3-200 MHz. It features dual impedance options of 50/75 ohms, providing flexibility for various applications. The HP500 has a dual instrument window for easy reading and positive press switches for user-friendly operation. With technical specifications including a frequency range of 3-200 MHz, the HP500 ensures accurate measurements with an accuracy of  $\pm 10\%$ . It offers power measurements at 10 W, 100 W, and 1 KW, catering to different power requirements. The meter's compact size, 160mm (w) x 115mm (h) x 110mm (d), makes it portable and convenient for use in different settings.
