

Kenwood TM-V7A programming software and USB-K4S

£44.95

DESCRIPTION

RT Systems KRS-V7A Programming software simplifies managing memory channel information and specific menu settings of the Kenwood TM-V7A radio. While the software covers all available settings, some adjustments can only be made directly on the radio. The software features a user-friendly spreadsheet layout with numerous point-and-click options. Users can easily retrieve the current radio configuration for editing or create a new file from scratch. Additionally, the programmer allows for convenient copy and paste of memory channel information between files and enables column editing to modify multiple channels with minimal typing. Moreover, the software provides an intuitive interface to access repeater information from sources like ARRL Travel Plus, RFinder-Worldwide Repeater Directory, Radio Reference, or Repeater Book. It also allows copying and pasting data from spreadsheets or websites, making data transfer seamless. Beyond memory channel programming, the software will enable users to adjust various radio menu items, enhancing the overall customization of the Kenwood TM-V7A radio. Includes: KRS-V7A Software, USB-K4S Cable, Requires: Microsoft Windows 8/8.1, 10 (32 or 64 Bit), or Win 11.
