DESCRIPTION

The Anytone AT-778UV Dual Band Mobile Radio offers a wide frequency range of 136-174MHz and 400-490MHz. With three output power options of 25W, 10W, and 5W, it provides flexibility for various communication needs. Equipped with 250 channels, it allows for efficient organization and management of communication. The radio also supports multiple encoding and decoding options such as CTCSS, DCS, DTMF, 2TONE, and 5TONE. Additionally, it features ANI function/PTT ID, Single Call, Group Call, Selective Call, and Emergency Call capabilities. The package includes the Anytone AT-778UV Dual Band Mobile Radio, a handheld microphone, a mounting bracket with screws, a power cable, and a user manual.
