

## **Icom OPC-1392 is a headset adaptor cable for VOX hands-free operation.**

**£53.95**

## **DESCRIPTION**

The Icom OPC-1392 Headset Adaptor Cable is designed for VOX hands-free operation, specifically for the IC-M71 model. This cable allows users to operate their radio without pressing any buttons, providing convenience and ease of use. This adaptor will enable users to communicate effortlessly while keeping their hands free for other tasks. The headset adaptor cable is a practical accessory for those who rely on their IC-M71 radio for communication. Users can focus on tasks without interruptions by enabling VOX to operate hands-free. This feature is handy in situations where manual operation of the radio is not feasible or convenient, allowing for seamless communication in various environments. Overall, the Icom OPC-1392 Headset Adaptor Cable enhances the functionality of the IC-M71 radio by offering hands-free operation. This accessory is a valuable addition for users who prioritize convenience and efficiency in their communication needs. With this cable, users can enjoy the benefits of VOX operation, making communication smoother and more accessible in diverse settings.
