Superstar 3900 transceiver CB mobile, CB, 10-meter, 2024 model.

£199.96

DESCRIPTION

A brand new take on classic radio has emerged, combining the iconic 80s design with a modern internal circuit board. This innovative model offers a blend of nostalgia and advanced technology, appealing to enthusiasts of both eras. This new radio model functions as a legal multistranded CB unit, designed to operate seamlessly across all legal European bands. Users can easily select their desired country of operation, allowing the radio to automatically configure itself to the appropriate legal frequencies and modes for that specific region. In the UK, this radio is compatible with the original UK 27/81 channels in FM mode, as well as the EU bands in various modes including AM, FM, USB, and LSB. With legal power outputs of 4W on AM/FM and 12W on SSB, it ensures reliable performance within regulatory limits. Additionally, the radio features a range of advanced controls accessible through a menu system, including a Noise Reduction Circuit, VOX, SWR protection, Voltage protection, and mic selection options. 6 bands from Super-Super-Low to Super-High (25.615-28.305MHz, with a higher output power of 12W AM/FM and 25W SSB).
