

Yaesu E-DC-6 is an external DC cable option for VX-5R, FT-50R, FT-817ND, and FT-818.

£9.95

DESCRIPTION

The Yaesu E-DC-6 is designed as an external DC cable option for several popular Yaesu radio models, including the VX-5R, FT-50R, FT-817ND, and FT-818. This cable provides a convenient way to power these radios using an external power source, offering flexibility for various operating conditions. With the Yaesu E-DC-6, users can connect their radios to a DC power supply or other external power sources, ensuring continuous operation without relying solely on battery power. This feature is particularly useful for extended operating sessions or when a reliable power source is needed in the field. Overall, the Yaesu E-DC-6 external DC cable is a practical accessory for Yaesu radio owners, offering a reliable and convenient power solution for their VX-5R, FT-50R, FT-817ND, and FT-818 models. Its compatibility with multiple radio models makes it a versatile option for radio enthusiasts looking to enhance their operating experience.
