

## **Yaesu fta-250l 8.33khz Airband transceiver**

**£219.95**

### **DESCRIPTION**

The Yaesu FTA-250L is an 8.33kHz Airband transceiver. It is designed specifically for aviation use, allowing pilots to communicate with air traffic control and other aircraft. The 8.33kHz frequency spacing ensures efficient use of the limited airband spectrum. The FTA-250L features a rugged construction, making it suitable for use in demanding environments. It has a large, easy-to-read display and intuitive controls for ease of use. The transceiver also includes a built-in GPS receiver, allowing pilots to view their position and track their flight progress. Overall, the Yaesu FTA-250L is a reliable and feature-rich transceiver for aviation communication.

250 Memory Channels, Now with an expanded memory bank, the FTA-250L can now store up to 250 memory channels for quick and easy recall, making this transceiver a pleasure to operate for heavy avionics users. High-capacity 1950mAh Li-ion battery

The FTA-250L comes packaged with our largest capacity battery yet. measuring in at 1950mAh, even heavy radio users are guaranteed to have a radio that will keep going strong all day long.

What's in the box - High Capacity (1950mAh) Li-ion battery, Headset adapter, belt clip, 100-240VAC charger, 12VDC charger/power cable, drop in the charging cradle.
