## **Yaesu XF-127CN 300 Hz CW narrow crystal filter.**

**£184.96**

### **DESCRIPTION**

The Yaesu XF-127CN is a 300 Hz CW Narrow Crystal Filter that is designed for the FTDX-3000 receiver. It features a down conversion 9 MHz 1st IF frequency receiver construction, which allows for the implementation of narrow 300 Hz (optional), 600 Hz, and 3 kHz bandwidth roofing filters. These filters are equipped with extra sharp Crystal Roofing Filters, which enhance the close-in dynamic range and overall receiver performance. With the 300 Hz CW Narrow Crystal Filter, users can expect superior filtering capabilities and improved receiver performance for their FTDX-3000.
